

CORROSION BLOCK®

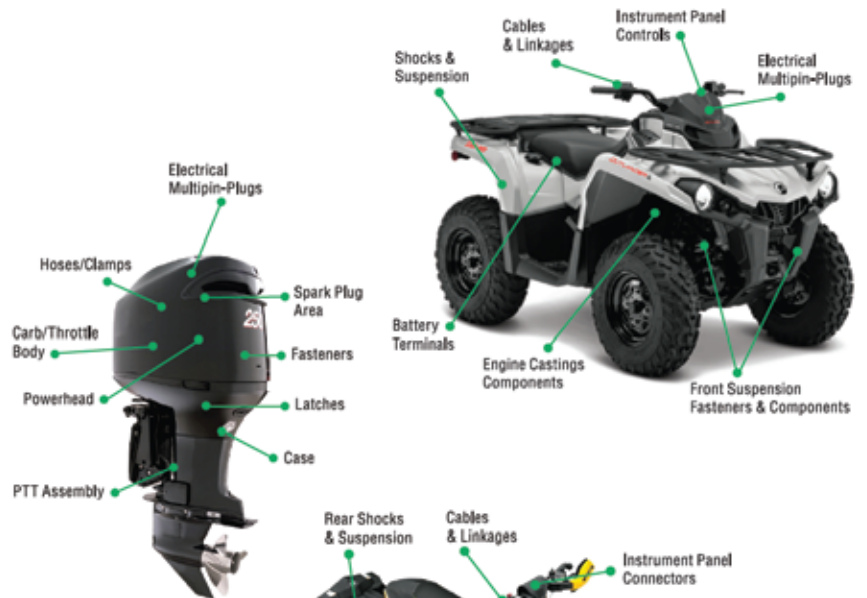

The Solution to the Ravages of Corrosion

Corrosion Block is a unique product that has the ability to both prevent and stop active corrosion in more places on Powersports Equipment than any other product of its type. Enthusiasts know that without prevention, corrosion is going to damage or destroy metal components and electrical systems.

All forms of corrosion affect unprotected steel and aluminum surfaces, as well as "all" electrical systems and components; pitting corrosion, galvanic, cracking, surface, inter granular, de-alloying, fretting and high temperature corrosion are present.

Kills Corrosion On Contact

- Prevents New Corrosion From Forming
- Extends Component Life
- Prevents Corrosion Induced Failures
- Protects metal components down to -70°F

12 oz. Aerosol

4 oz. Pump

32 oz. Bulk

4 L Bulk

CORROSION BLOCK® WATERPROOF GREASE

High Performance Multi-Purpose
Won't Dry, or Wash Out

- WATERPROOF
- Multi grease compatible
- Excellent extreme pressure (EP) properties
- Excellent thermal/oxidative stability
- Resists bleeding or melting at high temperatures
- Dielectric / non-conductive
- Workplace safe and environmentally friendly
- Out performs competitive grease 5:1

16 oz. Tub

Also available in: 2oz. Tube • 3 & 14 oz. Cartridge
